java09

Test1

Q1:

以下是Q1的实现代码:

```
import java.io.*;
public class Copy {
    public static void main(String[] args) {
        try(InputStream is = new FileInputStream("doro.jpg");
            OutputStream os = new FileOutputStream("doro_copy.jpg")
            )
        {
            byte[] bytes = new byte[1024];
            int len;
            while ((len = is.read( bytes)) != -1) {
                os.write(bytes, 0, len);
            }
        }catch (IOException e){
            e.printStackTrace();
        }
    }
}
```

使用了try-with-resources来自动关闭流资源(查阅资料后了解到了它是逆序关闭)

也就是先关闭输出流, 后关闭输入流

Task2

Q2:

```
import java.io.BufferedReader;
import java.io.FileReader;
import java.io.IOException;
import java.util.ArrayList;
import java.util.Collections;
import java.util.List;

public class Task9_Q2 {
    public static void main(string[] args) {
        try (BufferedReader br = new BufferedReader(new FileReader("name.txt"))){
        char[] chs = new char[1024];
        int len;
        List<String> line = new ArrayList<>();
        while ((len = br.read(chs)) != -1) {
            String s = new String(chs,0,len);
            s = s.replaceAll("\\s+"," ");
```

```
//s = s.trim();
    line.add(s);

}
    Collections.sort(line);
    System.out.println(line);
}catch (IOException e){
    e.printStackTrace();
}
}
```

使用了replaceAll这个API,把空格,换行符都替换成"",就相当于清除了空格可是一点间隔都没有很不美观,再次查询资料又知道一个符号"\\s+"它代指所有空白字符

之后的内容还没有学习~~~我的解答就到这里了!
